<b>Office Action Summary</b>	<b>Application No.</b> 10/823,017	<b>Applicant(s)</b> FULLER, MILTON A.	
	<b>Examiner</b> Navin Natnithithadha	<b>Art Unit</b> 3735	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims are rejected under 35 U.S.C. 102(b) as being anticipated by Harms et al, US 5,415,163 A ("Harms").

Claims 1-8 and 17: Harms teaches a detector 10 (see fig. 1), comprising: a body part receiver 14; a pair of nodes 36 and 38, each comprising electrically conducting plates; magnets 12; a source 34 coupled to one of the nodes; a receiver 40 coupled to the other node.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rapoport et al, US 4,875,786 A.

Claims 1-20: Rapoport teaches a detector 10 adapted to detect various constituents, e.g. glucose, in body fluid (see col. 2, ll. 57-68), comprising: a body part receiver 12 adapted to receive a finger; a pair of nodes 38' and 38" (see fig. 12) comprising an electrically conducting plate (conductive surface coils, see col. 4, ll. 47-64); a pair of permanent magnets 26 and 28; a source 46; a receiver 48

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 27-46 of U.S. Patent No. 6,723,048 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is well known to one of ordinary skill in the art that permanent magnets are a specific type of magnet, and thus, the claims in the present application would be obvious in view of the prior patent. In addition, the prior patent claims a base and permanent magnets whereas the present application does not claim a base and magnets in general. Thus, the present application is broader in scope.
